

6th Grade:

For summer math this year, students will be expected to log in to an online platform to complete assignments. The assignments will be posted every Sunday. There will be 3 to 4 assignments each week that should be completed by their posted due dates. All of these assignments together will comprise each student's first test grade of the year.

Use the following link to get to the login page: <https://www.mathgames.com/user/login>

The username for each student is their first name, then the first two letters of their last name, and then the number 6 for their grade. (no spaces and no caps)

For example, the username for Adriel Waller would be: adrielwa6

The password is: math6

Once you click to login, it should show the student's name on the top of the page, which you can click to go into the main page. The assignments that are due should pop up on the screen, but you can also click the assignments tab to see all of the current assignments.

The first assignments are already posted. If you have any questions, my email is: [caroline.galvinhill@tca11.com](mailto:caroline.galvinhill@tca11.com)
